SATURDAY, OCTOBER 16, 1909.

Exit Tickets and Pickets. But we still  
have Cook and Peary with us.The said that J. M. Harris will re-  
marry. Here is something that every  
woman at least supposed.Capt. Amundsen is going in a polar  
trip with bears to draw his sleds. Good  
scheme. The bears could make short  
work of any rival explorers encountered.If a tonnage tax for iron ore and  
copper, why not a bushel tax for  
wheat, oats, peas, peaches, apples, etc.  
No more injustice to one than the  
other. Furthermore, why not a per-  
sonal property tax for farmers? It isdollars to worry apples that not one  
farmer in thirty pays a personal tax.  
And it is a poor lower peninsula farmer  
who does not possess several  
thousand dollars worth of taxable personal  
property over and above his ex-  
emptions.—Iron Mt. Press.In his address on the occasion of  
the dedication of Mt. Pleasant high  
school recently, Pres. Angell said a  
few words directly to the boys:  
"A boy is not much good unless he  
develops manliness; learns obedience;  
is trained in courtesy; forms habits  
of tidiness and cleanliness; possesses  
the virtue of veracity. Lies destroy  
the entire foundation of the boy's character,  
therefore, untruthfulness must be  
shunned and the virtue of veracity  
cultivated steadily and persistently."  
Pres. Angell has had under his control  
no less than 30,000 boys, and his  
observation is that the liar is utterly  
useless as a student and in every other  
avenue of life.

## WANTS OSBORN.

That the incident discussed for Os-  
born is not confined to the upper penin-  
sula is demonstrated by the follow-  
ing abstract from the Saranac Advertiser  
of last week:While it will be a year before the  
election is held at which the people  
will select a governor in this state, a  
number of candidates have already  
announced their candidacy. Taking  
into consideration the events of the  
past few years and the fact that the  
Republican party has been divided into  
factions, we believe the time has come  
for the Republicans to get together and  
demonstrate the benefits of the primary  
reform law by the selection of a new  
candidate and giving him a clean  
bill of fare and no strings tied to him  
by any club or faction. A house di-  
vided against itself cannot stand, neither  
can a party. The success of the  
Republican administration was placed  
in that position free to act on his best  
judgment and with no party boss to  
dictate. Let us have this kind of gov-  
ernor in Michigan. There is a man  
who will meet every requirement of the  
present situation. A man who has  
served the state in the past in a num-  
ber of important positions and in every  
one of which he has proven his quali-  
fications, his ability, and that he has  
executive force to carry out his pol-  
icies and the courage of his conviction  
and to give a clean and honest busi-  
ness administration. A successful  
business man, a scholar, and one who  
has had the advantage of exten-  
sive travel and who would bring to  
this important office a world-wide ex-  
perience. A man who has always been  
a friend of the common people and one  
of them in the true sense of the word.  
This man is Chase S. Osborn of Saint  
Ste. Marie. During the recent sena-  
torial contest Mr. Osborn was out of  
the country and took no part in it, and  
he has in no way identified himself  
with any faction and if the people will  
nominate and elect him governor, he  
will be a governor that everyone will  
be proud of.

## HALLOWEEN.

In two weeks the gods of fun and  
frolic will be turned loose in the city  
and for one whole night the police will  
be on the alert every minute to en-  
sure some violation of the peace and  
dignity of the state of Michigan.It is not all hoodlums on Hal-  
loween. And about the only ones who  
call Halloween pranks to that very  
unpleasant name are the police and  
some people who were never boys or  
girls themselves. Of course some  
things are done on that night of ro-  
cery that are better left undone, such  
as carrying off people's woodpiles and  
disposing of them in some remote  
neighbor's yard, taking a delivery wagon  
and placing it in some strange  
environment, tearing away gates and  
doing such things that cause expense  
and a great deal of trouble to peace-  
loving citizens. But taken as a whole  
the boys and girls are, both little and  
big, just about as much fun on Hal-  
loween night as during the police and  
raucous persons as they do in try-  
ing to bag off buildings and things  
like that. Nothing is quite as much  
fun on Halloween night for the small  
boy as the sight of a boy riding out  
of the mist with a jack-o'-lantern in his  
hand. Few boys could run as fast as  
a small boy, and when there is only  
one in a dozen youngsters, he has to  
go slow.Although it is still early the shops  
are appearing their Halloween goods,  
and counters are devoted to the most  
varied array of novelties in anticipa-  
tion of the many parties that are al-  
ways given during this season. Lush  
cloths of bright yellow with wild-eyed  
black cats and heady eyed bats  
swatched in fantastic patterns over  
the whole are alternating with  
lunch cloths showing the golden  
pumpkin and corn in the ear. They  
are festive plates with the jack-  
o'-lantern designs, but cups carried on  
the backs of black cats who look as  
though they had just met a dog face  
to face. Candle shades with bats and  
vixen heads and most weird of  
all, there are skeleton heads with  
hollow eyes and grinning teeth that  
would make any shadow spooky enough.Halloween comes on Monday this  
year, and no doubt the police will be  
ready to protect the property of the  
city.

## THIS IS MY 38TH BIRTHDAY.

Edward Dana Durand, the new dis-  
trictor of the United States census,  
was born in Romeo, Michigan, October  
18, 1871, and after graduating from  
Oberlin college, became assistant pro-  
fessor of administration and finance  
in Leland Stanford University. From  
1900 to 1902 he served as secretary of  
the United States census office. Mr.  
Durand has written extensively on  
economics and is considered a high  
authority on that subject.

## THIS DATE IN HISTORY.

1677—The assembly of Connecticut  
regulated the prices at which hides  
and shoes should be bought and sold.  
1775—Continental Congress adopted  
The Pine Tree flag.  
1820—James Jackson, who became  
chief justice of the Georgia supreme  
court, born in Jefferson county, Georgia.  
1821—Frederick William III, German  
emperor, born. Died June 15, 1888.  
1854—Alexander H. Stephens ad-  
dressed a great democratic mass meet-  
ing in Atlanta.  
1867—Raid on St. Albans, Vt., by a  
party of Confederates from Canada.  
1888—Count von Bismarck succeeded  
Prince Hohenzollern as chancellor of Ger-  
many.  
1901—Joseph P. Smith succeeded to  
the presidency of the Mormon church.

## HOUGHTON

## COURT WILL ADJOURN.

Houghton County September Term of  
Court to Close Today.The September term of circuit court  
for Houghton county will probably  
close this afternoon, when the last civil  
case on the docket will have been  
disposed of. The last case is that  
brought by P. H. Finnegan of Calu-  
met against George P. Baldwin for al-  
lowed libel which was started Satur-  
day, and it is hoped that it will be  
closed before the court adjourns this  
afternoon.Judge A. T. Storer will open the  
October term of circuit court in Bu-  
taga county tomorrow.

## HOTON BREVITIES.

T. A. Stellar and Oliver Brunette,  
left last evening for the Soo to at-  
tend the convention of delegates

all the best selections from "The  
Red Mill" played by Victor Herbert  
and his orchestra. This is Mr.  
Herbert's music played the way he  
wants it played. Edison Amberol  
Record No. 215, for theEdison  
PhonographGet complete list of October Records from  
your dealer, or write to Edison Phonograph  
Company, 25 Lakeside Avenue, Orange, N. J.ed States senator, will arrive in  
Houghton tomorrow evening and will  
spend Wednesday in the copper coun-  
try. Mr. Townsend will be royally en-  
tertained by representative citizens  
while here.Mrs. H. J. Stevens and Mrs. C. J.  
Kettner have returned from Boston,  
where they accompanied Miss Ellen  
Stevens who is attending school there.Edward Kane, a well known employe  
of the Michigan State Telephone Co.,  
here, will be married at 6 o'clock to-  
morrow evening at Dollar Bay to Miss  
Fannie Baker of that place. They will  
reside in Houghton where the groom is  
well known.Miss Myrtle Marcellus of New York  
is visiting with Mr. and Mrs. Charles  
E. Avery of Houghton.A dance will be given at Hurontown  
fire hall by the Isle Royale band Satur-  
day evening.

## Swearing.

The real truth is that in a vast  
majority of cases swearing is simply a  
vainglorious practice, through which  
the blasphemous hopes to give weight  
and authority to his statements. Or  
it may indicate the weakness of un-  
bridled passion.—Indianapolis Star.

## Daily Thought.

A man is only happy when he be-  
lieves himself to be so, in whatever  
way the proposition is turned, and  
no man believes himself so happy but  
what he might be happier.—F. Marion  
T. W. and.Latest Picture of the Heir  
to the Throne of HollandQueen Wilhelmina and the little prin-  
cess who will one day rule all Holland.ONE DOSE WILL RELIEVE INDIGESTION,  
STOMACH GAS, HEARTBURN, OR HEADACHETake a Little Diapiesin Now and  
Your Stomach Will Feel Fine in  
Five Minutes—There is Not a Man  
or Woman in Calumet Who Suffers  
Who Can Afford to Leave Diapiesin  
Untried.Every family here ought to keep  
some Diapiesin in the house, as any  
one of you may have an attack of In-  
digestion or Stomach trouble at any  
time, day or night.This harmless preparation will di-  
gest anything you eat and overcome a  
distressed, out-of-order stomach five  
minutes afterwards.If your meals don't tempt you, or  
what little you do eat seems to fill  
you, or lays like a lump of lead in your  
stomach, or if you have heartburn,  
that is a sign of Indigestion.Ask your Pharmacist for a 50-cent  
case of Pape's Diapiesin and take a  
little just as soon as you can. There  
will be no sour risings, no belching  
of indigested food mixed with acid, no  
stomach gas or heartburn, fullness or  
heavy feeling in the stomach, Nausea,  
Debilitating Headaches, Dizziness or  
intestinal griping. This will all go  
and, besides, there will be no sour food  
left over in the stomach to poison your  
breath with nauseous odors.Pape's Diapiesin is a certain cure  
for out-of-order stomachs, because it  
prevents fermentation and takes hold  
of your food and digests it just the  
same as if your stomach wasn't there.Relief in five minutes from all stom-  
ach misery is at any drug store, wait-  
ing for you.These large 50-cent cases contain  
more than sufficient to cure almost  
any chronic case of Dyspepsia, Indi-  
gestion or any other Stomach trouble.

## As Progressive as the Times

This establishment is always on the look out for the best of service to render to its patrons. It has been our constant aim to improve our shops and the class of work turned out until today we are far in advance with modern machinery and methods of Pressing, Dyeing, Dry Cleaning and Repairing of any similar establishment in the State. Just a few months since we installed our modern Carpet Cleaner, and today thousands of Calumet women are praising it to the top notch as being by far a better cleaner than the old method of beating and much cheaper, in the saving of wear and tear of the Carpets and Rugs. Our latest addition to our plant is the Celebrated HOFF-MAN CLOTHES PRESSING MACHINE. Read a few of its good qualities, see the illustrations and decide at once to let us do your work ever after.

THE OLD METHOD OF CLOTHES PRESSING

The pressing of clothes is performed by applying steam to the cloth, rendering it soft and flexible and easy to stretch and mould into the desired shape. The method of accomplishing this from time immemorial has been by placing a wet cloth, known as a sponge or press cloth, over the goods to be pressed, then applying to this an iron hot enough to turn the water in the sponge cloth into steam, and drive it down into the goods beneath. This iron is usually heated on a stove until hot enough, or prob-  
ably a little hotter than needed. This iron, by being heated on the stove and cooled during the operation of pressing, is but for a short time in the proper degree of heat for the work in hand, and to overcome this there has been developed a means of heating the pressing alone, and consequently if left in one spot too long will burn or scorch the garment.

Many efforts have been made to improve in details these self-heating irons, by means of applying pressure by levers, but up to the time of the invention of "THE HOFF-MAN," pressing by direct application of steam, no advance had been made in the art, nor had any material advantage been gained over the methods of our forgotten ancestors.

"THE HOFF-MAN" Steam Clothes Pressing Machine is one of those radical steps forward that proves the superiority of the times in which we live, and is a factor of the Twentieth Century. Not only does this machine do all that was done by the hand iron, but the direct application of steam to the garment is both sanitary and renovating, and accomplishes the desired ends without that excessive pressure that has heretofore been thought necessary and has often destroyed the life of the goods.

## WHAT "THE HOFF-MAN" MACHINES ARE AND WILL DO.

"THE HOFF-MAN" is a combination of steam heat and pressure. The steam is generated in a boiler attached to the machine, it requiring twenty to thirty pounds of steam to sponge the goods. The steam is superheated to a high degree of temperature before being injected in the garment, which is placed on a press block similar to the ordinary one in use by tailors. The iron is then brought to bear upon the garment, and at the same time the necessary amount of steam is released and forces its way through the garment, sponging and pressing it at the same time.

"THE HOFF-MAN" assures a uniform sponging and pressing of the garment. By it you can sub-  
ject the garment to a steady pressure as long as desired, so that the cloth assume a permanent set. The pressure, with the hot steam to soften and sponge the cloth, produces this set in an incredibly short time, and the result is three times the quantity of work with one-half the effort required with the hand iron, while the quality of the work is superior.

By "THE HOFF-MAN" dry steam process, the pure, dry steam is applied direct, and when forced through the fabric it leaves it clean and wholesome, with a finish that looks like new.

Steam is also the greatest factor in making a garment comfortable and easy to shape, and being applied at such high temperature, it evaporates almost immediately, and three minutes after the garment is off the machine, it is ready to wear.

No danger of burning or scorching the garment by dry steam process, while a higher degree of heat is applied to the garment than can be applied with the hand iron without danger of burning or in-  
juring the fabric.

A garment that passes through "THE HOFF-MAN" is disinfected, as no germs or microbes can exist under a temperature as high as the dry steam injected; at the same time it removes any odor that might be in the goods, takes away the grimy appearance, raises the nap, revives the colors, and imparts to the garment that freshness desired by all dressers.

## THE ART OF CLOTHES PRESSING

The method of accomplishing this from time immemorial has been by placing a wet cloth, known as a sponge or press cloth, over the goods to be pressed, then applying to this an iron hot enough to turn the water in the sponge cloth into steam, and drive it down into the goods beneath. This iron is usually heated on a stove until hot enough, or prob-  
ably a little hotter than needed. This iron, by being heated on the stove and cooled during the operation of pressing, is but for a short time in the proper degree of heat for the work in hand, and to overcome this there has been developed a means of heating the pressing alone, and consequently if left in one spot too long will burn or scorch the garment.

Many efforts have been made to improve in details these self-heating irons, by means of applying pressure by levers, but up to the time of the invention of "THE HOFF-MAN," pressing by direct application of steam, no advance had been made in the art, nor had any material advantage been gained over the methods of our forgotten ancestors.

"THE HOFF-MAN" Steam Clothes Pressing Machine is one of those radical steps forward that proves the superiority of the times in which we live, and is a factor of the Twentieth Century. Not only does this machine do all that was done by the hand iron, but the direct application of steam to the garment is both sanitary and renovating, and accomplishes the desired ends without that excessive pressure that has heretofore been thought necessary and has often destroyed the life of the goods.
